

THE MEGALIFT SOLUTION

The Megalift is an innovative new type of asset in the Dawsongroup | Material Handling product range, and is exactly what transport companies have been missing to ensure their fleet is fully utilised.

Dawsongroup | truck and trailer

Simply put, the **Megalift** is a 40-foot trailer with two cranes, one mounted on the front and one on the back, which can be between 20 and 40 feet in length-weighing up to 35 tonnes. The trailer can be connected to the back of any existing truck and within two minutes it's ready to deploy a fully loaded container in any location.

Dawsongroup | truck and trailer

A unique piece
of equipment,
it is best described
as a self-loading trailer

Benefits

- Lifting capability away from traditional infrastructure
- Frees up containers from skeletal trailers to maximise fleet capacity
- One person operation
- Telescopic to handle different length loads
- Rapid deployment in minutes
- Works on any surface
- Loads from ground to trailer to second trailer
- Lifts to and from freight trains
- Puts containers on the ground for easier, safer access
- Perfect for containers but will lift anything that can be chained up within size specs
